3rd-5th grades
Geology, Hydrology
Meteorology, Astronomy

Course Overview:

Join our crew of intrepid adventurers as we investigate and discover God's creation all around us. Students will be active and engaged with experiments and games while learning all about God's magnificent Earth: geology, lithosphere, hydrosphere, atmosphere, meteorology, astronomy, and much more. The textbook (God's Design for Heaven and Earth Student Reader by Richard and Debbie Lawrence) is optional; students can come to class with a simple three-ring binder and basic school supplies.

Instructor:

I have a BBS (secondary education) from Crown College. I loved teaching at a small private school in Grand Rapids and have continued my love of teaching and community with children's church ministries and co-op.

I am a wife of over twenty years and mother to two young adults. We started homeschooling in 2010 and have enjoyed our years at co-op. We are quirky gameschoolers who never turn down a good science experiment: the messier the better!

Self-Pay Fees: \$330 total tuition: \$165 due September 4, 2024; \$165 due January 15, 2025. If the class is dropped after the third class of the semester, tuition is not refunded.

LAMP Fees: \$330 tuition; if LAMP only provides partial payment, you will be responsible for the rest, which will be due October 16, 2024. Students are required to self-pay for any missed LAMP payments due to dropping after the third class or not meeting LAMP requirements during the semester.
